

Arrhythmia Alliance

Pace4Life

www.pace4life.org

Arrhythmia Alliance Pace4Life (A-A P4L) is a charity that donates cardiac implantable electronic devices (CIED) such as pacemakers and implantable cardioverter defibrillators to people in need in low and middle-income countries (LMIC).

A-A P4L provides these life saving devices to people who desperately need them, but cannot afford them.

Every year, up to 2 million people die in LMIC because they don't have enough money for a lifesaving pacemaker operation.

A-A P4L AND CIED MISSIONS

- We send physiologists and pacing teams to LMIC to train local cardiac teams to implant CIED.
- We accept donations of equipment to send to programmes in LMIC.
- We accept used devices from hospitals and funeral directors.
- Each device is checked & any with more than five years of battery life are put through an FDA approved reconditioning process & sent for use in LMIC.

HOW CAN YOU HELP?

PACING TEAMS

Would you like to join us as part of the heart surgery team on future missions? Or help us with donations and fundraising? Then please contact us www.Pace4Life.org. We'd love to hear from you.

We really want to connect to as many physiologists, cardiologists and pacing teams as possible.

WE ARE SEEKING:

- Expired stock that we can send straight out to LMIC, particularly expired or de-sterilised devices.
- Explanted devices with battery life.
- Removed / explanted devices to send to recycling rather than landfill (think yellow bins).
- People or teams that would be happy to travel to LMIC to train cardiology pacing teams.

We need your help to continue our life saving work
